Allowable Subject Matter

1. Claims 21-28 and 30 are allowed.
2. The following is an examiner's statement of reasons for allowance: Applicant's arguments are persuasive in that the prior art neither anticipates, nor renders obvious, a method for the milling-type machining of *chipless materials* for the manufacture of *heat-resistant sand molds* as claimed in independent claim 21.

The closest prior art is US Pat. No. 2,621,548 (Williams) which is discussed in detail in the previous office action.

'548 teaches the shank-end tool as claimed, but does not teach a method of machining a chipless material with the shank-end tool to provide a finished form.

'548 specifically teaches the removal of material with the specific teaching of the method of performing various "cutting operations" with the tool.

'548 does not disclose the method of machining chipless materials to provide a finished form as is currently claimed.

Therefore '548 does not anticipate the method claim of independent claim 21.

Furthermore, there is no prior art, either alone or in combination with '548, that would render obvious the method of machining chipless materials to provide a finished form with the structure of the tool claimed, and no motivation found to modify '548 to obtain the claimed invention.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue
